

## Slide Quiz Fall 2021 Answers

1. Strongyloides infection
2. Sclerosing adenosis
3. Atherosclerosis (presumably leading to myocardial infarction and death)
4. Retinoblastoma
5. Complete hydatidiform mole
6. Melanoma
7. Papillary urothelial carcinoma (non-invasive, lots of areas of inverted growth)
8. Follicular lymphoma (of course, you'd want/need stains/flow 😊)
9. Mucinous cystic neoplasm.
10. Verrucous carcinoma
11. Adamantinoma
12. Meningioma (angiomatous or microcystic)
13. Serous Carcinoma *and* Serous Tubal Intraepithelial Carcinoma (STIC)
14. Scrotal Calcinosis
15. Endometriosis
16. Invasive breast carcinoma, no special type (ductal), with LVI
17. Balanitis Xerotica Obliterans (BXO)
18. Serous Cystadenoma
19. Angiolipoma
20. Pleomorphic adenoma
